Aster TV Version 2

Owner decisions and final acceptance questionnaire

This version removes the completed Seerr approvals and replaces the advance bug list with a final page-by-page walkthrough. Tick the choices that matter to you, write notes where useful, and leave undecided items blank.

1. Household pilot and release approach

Who should complete the household pilot before production promotion?

[ ] Jason only
[ ] Jason plus one family member
[ ] General household use

Preferred trial duration:

[ ] Two days
[ ] One week
[ ] Two weeks
[ ] Other:

Other duration or essential household scenarios:

Once packaging, recovery, soak testing and the final walkthrough pass, how should Version 2 be promoted?

[ ] Promote the accepted Version 2 family together
[ ] Promote in stages
[ ] Keep Version 2 on HP until one final visual walkthrough
[ ] Decide after the pilot

2. Bedroom-client target

Which playback capability should define the recommended minimum?

[ ] 1080p SDR with ordinary stereo
[ ] 1080p SDR with HD-audio passthrough
[ ] 4K SDR
[ ] 4K HDR10 at 60 Hz with HD-audio passthrough
[ ] Give me separate recommendations for all tiers

Preferred maximum hardware price, if any:

Bedroom-client feature set

Tick everything the pared-back client should retain.

- [ ] Media and Continue Watching
- [ ] Books and podcasts
- [ ] Home Assistant dashboard
- [ ] EPUB reading and narration
- [ ] Voice search
- [ ] Music
- [ ] News Digest
- [ ] Camera live view
- [ ] Seerr requests
- [ ] Screensaver and full Aster branding

3. Remote power button

When the lab G20 power event can be observed, what should Aster prefer?

- [ ] Suspend Aster and wake with the remote
- [ ] Turn off the display/receiver but leave Aster running
- [ ] Open a compact Power menu
- [ ] Shut down completely
- [ ] Test every safe option before deciding

4. Voice search

Voice search should cover:

- [ ] Movies and television
- [ ] Books, audiobooks and podcasts
- [ ] Home Assistant entities/actions
- [ ] Everything above
- [ ] Music
- [ ] News
- [ ] Seerr discovery
- [ ] Defer any action-capable voice commands

Preferred activation:

- [ ] Hold the microphone button while speaking
- [ ] Press once to start and again to stop
- [ ] Use whichever method the remote reliably supports

5. YouTube

Until official API setup and the Version 2 redesign are complete:

- [ ] Keep YouTube visible but clearly unavailable when unconfigured
- [ ] Hide YouTube until Version 2 support is ready
- [ ] Keep the current official Kodi add-on available
- [ ] Defer the decision

Recommendations and Recently Added

Proposed shared behavior for Media, Music and Books

Proposed default: replace the Recommended rail with Recently Added. When no Up Next or Recently Added tile is focused, the hero rotates through genuine recommendations. The hero's Play and More Info actions always follow the currently shown recommendation. Focusing a tile immediately stops rotation and makes that tile authoritative.

6. Shared hero behavior

Should the hero resume recommendation rotation after focus leaves a content tile?

[ ] Yes - after a short idle delay
[ ] No - retain the last focused title
[ ] Unsure - compare both on HP

Preferred automatic rotation pace:

[ ] 8 seconds
[ ] 12 seconds
[ ] 15 seconds
[ ] Use the calmest pace found in testing

When a recommendation is already owned, the primary action should be:

[ ] Play
[ ] Resume when progress exists, otherwise Play
[ ] Open its details page

Should each recommendation include a short 'Why this was suggested' line?

[ ] Yes
[ ] No
[ ] Only on More Info

7. Media landing page

[ ] Replace Recommended rail with Recently Added
[ ] Retain Up Next above Recently Added
[ ] Rotate film and TV recommendations together in the hero
[ ] Preserve Play and More Info on the hero

Media-specific notes:

8. Music landing page

[ ] Use Recently Added albums/tracks as the main rail
[ ] Rotate recommended albums/artists/playlists in the hero
[ ] Make the hero primary action Play or Shuffle as appropriate
[ ] Keep holiday exclusions only on Shuffle All, not recommendations

Music-specific notes:

Books and Acquisition Hub

Books hero decisions and the Unified Media Portal boundary

9. Books landing page

[ ] Use Recently Added ebooks, audiobooks and podcasts as the main rail
[ ] Rotate recommended books and audiobooks in the hero
[ ] Resume is primary when listening/reading progress exists
[ ] Keep podcasts out of book recommendations unless explicitly selected

Books-specific notes:

10. Media Acquisition Hub integration

The existing lab portal keeps authority separated: Seerr requests film/TV, Lidarr requests albums, LazyLibrarian marks books/audio wanted, and download clients remain inaccessible to AsterTV. The recommended television design consumes only a sanitized catalogue and submits explicit, confirmed actions through restricted brokers.

Where should acquisition recommendations appear?

[ ] In the rotating hero only
[ ] In the hero plus a dedicated Discover page
[ ] Dedicated Discover page only
[ ] Use HP testing to choose

For an unowned recommendation, the primary action should be:

[ ] Request - with an in-place confirmation
[ ] More Info first, then Request
[ ] Open the private web portal
[ ] Display only; requests stay elsewhere

Which acquisition domains should AsterTV expose?

[ ] Film and TV through Seerr
[ ] Ebooks through LazyLibrarian
[ ] All four, introduced one domain at a time
[ ] Music albums through Lidarr
[ ] Audiobooks through LazyLibrarian
[ ] Recommendations only - no request actions

Recommendation personalization:

[ ] One shared household recommendation set
[ ] Separate recommendations by Jellyfin/Audiobookshelf user
[ ] Shared by default with an optional profile selector

Acquisition Hub notes or limits:

Final Page-by-Page Walkthrough

Complete this near the end of the project. For every problem, note the page, exact remote action, observed result and expected result. Version 1 issues still present and new Version 2 corrections enter the same final defect register.

11. Shared shell and navigation

Top rail, side rail, clock, focus, Back behavior, remote mapping, search, sounds, screensaver and wake.

[ ] Pass [ ] Needs correction [ ] Not tested [ ] Deferred by design

Notes / reproduction:

12. Media

Hero rotation, Up Next, Recently Added, genres, details, playback, Continue Watching, OSD, subtitles/audio/quality and stop-on-exit.

[ ] Pass [ ] Needs correction [ ] Not tested [ ] Deferred by design

Notes / reproduction:

13. Music

Home, Albums, Artists, Songs, Playlists, Genres, queue, shuffle, saved playlists, hero artwork and Music player.

[ ] Pass [ ] Needs correction [ ] Not tested [ ] Deferred by design

Notes / reproduction:

14. Books and podcasts

Landing page, ebook/audiobook/podcast lists, art, synopsis, playback, chapters, resume, bookmarks, sleep timer, Reader and narration.

[ ] Pass [ ] Needs correction [ ] Not tested [ ] Deferred by design

Notes / reproduction:

Final Walkthrough - continued

Use additional paper if a problem needs more reproduction detail.

15. News

Daily Digest, Breaking News, story image/synopsis, timeline, selection highlight, Play All and story selection.

[ ] Pass [ ] Needs correction [ ] Not tested [ ] Deferred by design

Notes / reproduction:

16. Home

Dashboard freshness, cameras, timer, controls, visual hierarchy, offline states and status detail.

[ ] Pass [ ] Needs correction [ ] Not tested [ ] Deferred by design

Notes / reproduction:

17. Settings and diagnostics

Status page, network/service diagnostics, accessibility options, recovery information and truthful unavailable states.

[ ] Pass [ ] Needs correction [ ] Not tested [ ] Deferred by design

Notes / reproduction:

18. Acquisition and discovery

Owned/unowned status, recommendations, request confirmation, pending/duplicate handling and safe failure when the hub is unavailable.

[ ] Pass [ ] Needs correction [ ] Not tested [ ] Deferred by design

Notes / reproduction:

19. Final sign-off

Overall result:

[ ] Ready for production candidate

[ ] Ready after listed corrections

[ ] Needs another HP review

[ ] Hold

Highest-priority remaining correction:

Owner signature / initials Date
